CAMELLIA CATALOG

1951 — 1952

SCENE IN CAMELLIA GARDEN
BAYOU GARDENS

FOREWORD

The BAYOU GARDENS NURSERIES are devoted exclusively to the raising of CAMELLIAS and SASANQUAS. It has been found that Camellia culture is a science in itself and the production of strong, healthy Camellias and Sasanquas leaves no time to devote to the raising of other shrubs and ornamentals.

The Nurseries contain many Camellias and Sasanquas on their own roots, but this catalog lists only GRAFTED PLANTS.

Only healthy, vigorous stock is shipped, but there is no guarantee that plants will live, as that depends upon conditions beyond our control.

Experience shows that occasionally grafted Camellias do not bloom true in color. Grafted plants from scions of solid varieties sometimes show white, and vice versa. This is beyond the control of the nurseryman and we guarantee the scion as to variety only.

We strongly urge those unfamiliar with Camellia culture to study some of the standard, authoritative works on the subject, or to employ some experienced person, before planting, as location and soil preparation are essential to healthy growth. Camellias are valuable plants and their value increases yearly. Give them the intelligent care and attention they deserve.

On some of the newer varieties our stock is necessarily limited. These plants will be sold as long as the supply lasts. Sometimes we are out of the particular SIZE graft ordered. It has been our practice in such cases to substitute the next smaller or larger size in the variety specified, and make the necessary price adjustment. We have never received a single complaint in this regard.

BUSINESS TERMS

Terms are strictly cash with order.

Crating is done at cost with a minimum charge of \$1.50. All shipments are made express collect, F. O. B. Lacombe, La., unless otherwise directed.

Sincerely,

BAYOU GARDENS.
